

INDEX OF BIRD PHOTOS - NICK ATHANAS / ANTPITTA.COM

All photos are currently hosted on Flickr, and these links will take you to my Flickr site (<https://www.flickr.com/antpitta/>). I do not block downloads, so you can download anything by clicking the down arrow icon in the lower right part of the screen. Use the "find" function to quickly locate what you are looking for, or just scroll down if you prefer. CTRL-F (or CMD-F) is a shortcut for the find function in most English-language apps. The taxonomy follows the October 2024 version of the Clements/eBird list. The first column is the number of photos. The second column is a subjective quality rating for the photo (or the best photo if there are more than one), from A (best) to E (worst). These ratings often reflect my personal tastes, so you may not agree with all of them. I frequently reevaluate photos, and some of my earlier shots were rated too high - I am working on updating them. For the most part, all photos are at their maximum useable resolution. If you would like the original, unprocessed file, please email me at nick_athanas@hotmail.com.

Note: I recommend shift-clicking these links to open them up into new browser tabs.

Totals: 8156 photos/4058 bird species. Recently added photos may not be in the index yet. Updated 24 March 2025.
